

St. Monica's Catholic Church Sound System

St. Monica's Catholic Church has a **3.5mm aux audio (headphone) jack** to connect to the sound system. Please see the picture below:

Therefore, if you would like to play music using a smartphone that is able to connect directly to a 3.5mm aux audio jack, you may not need to bring any adapter. However, if your phone needs an adapter – such as *iPhone 7 or later versions of iPhone or Samsung Galaxy phone with USB C type* – **you should bring your own 3.5mm aux audio jack adapter (or cable).**

Please see the photos below:

If you have any questions regarding our sound system or if you want to use other equipment to play music, please email us and discuss with the assistant priest:
